VVNT SEQUOR LLP · CYBERSECURITY

Cybersecurity Assessment, Assurance *& Resilience*

Find and fix cyber risks before they are exploited — prioritised by business risk, validated after remediation.

VAPT · SAST · DAST · IAST | 3PAA | Remediation Validation

VVNT SEQUOR LLP helps organizations identify, prioritise and remediate cyber risks across applications, APIs, cloud, infrastructure and digital platforms — through risk-based security assessments, VAPT, cloud security reviews, DevSecOps integration and security architecture assessments, with actionable findings and documented evidence for governance, compliance and risk management.

WHAT WE SECURE

01 **Web Applications**
02 **APIs**
03 **Mobile Apps**
04 **Cloud Environments**
05 **Infrastructure**

DELIVERED WITH

VVnT Converge™

Our proprietary assurance platform supporting security testing, findings management, remediation tracking and validation reporting.

Our Services Include

- Healthcare & HealthTech
- Government & Public Sector
- SaaS & Technology Companies
- E-Commerce & Retail
- Manufacturing & Industrial
- Logistics & Supply Chain
- Critical Business Applications & Platforms

Why *VVNT SEQUOR*

Expertise across Cybersecurity, Digital Assurance, Quality Engineering, Privacy, Governance, Risk and Compliance — assessments focused on business risk, resilience and actionable remediation, not just vulnerability lists.

Risk-prioritised findings | Actionable remediation | Fixes validated | Compliance evidence

RELATED SERVICES SOC 2 Readiness, Implementation & Audit Support · ISO 27001, 42001, 27701, 9001 & SOC 2 Compliance · Privacy Governance & Data Protection Advisory · Software Testing, Quality Engineering & Digital Assurance · Test Automation & Continuous Quality Engineering

Testing is performed only on systems you authorise, under an agreed scope and rules of engagement.

Secure before *it's exploited.*
